UNDERSTANDING HOW YOUR BOARD WORKS

When you join, you are placed on a **matrix board with 14 open positions** below you. As new members enter the system and purchase credits, they are placed on boards from **top to bottom, left to right** until all positions are filled.

Your **earnings come from the bottom row of 8 positions (pay line)**, not from every new member who joins.

Each time someone lands on one of your 8 pay line positions, you receive an instant Bitcoin payment.

Once the **8th and final pay line position** is filled, that commission is used to **open a new board for you**—allowing you to continue earning automatically without repurchasing a position.

03

HOW MUCH WILL YOU EARN?

You **only earn when someone lands on one of your 8 pay line positions**. The amount you receive depends on the package level of the new entry.

For example:

- For every person that lands on your pay line with a **\$100 package**, you earn **\$100 in Bitcoin**
- For every person that lands on your pay line with a **\$1,000 package**, you earn **\$1,000 in Bitcoin**
- For every person that lands on your pay line with a **\$4,000 package**, you earn **\$4,000 in Bitcoin**

Once the **8th and final pay line position** is filled, the commission from that position is **automatically used to open a new board** so you can keep earning without having to buy back in.

No waiting. No approvals. All payments are made instantly in Bitcoin.

04
